The supply of water to the Wellington region is potentially vulnerable to significant disruption in the event of failures caused by a major earthquake. An application in 2017 by Wellington Water for an easement for a storage reservoir referenced a 2009 study conducted by GNS Science of possible earthquake damage to the water network. This study estimated that for a magnitude 7.5 Richter scale earth

Wasser als Energiespeicher - neue Ideen und Konzepte

Die Speicherung elektrischer Energie hat gro& #223;e Bedeutung f& #252;r den Ausgleich der Schwankungen zwischen Strombedarf und Stromproduktion. Infolge der in Mitteleuropa massiv
